2. From a problem to a service · 13 puan

In this fictional account, Derya starts a small repair business in 2021. At first, she spends her savings on attractive advertisements, but few people contact her. She interviews local residents and learns that many cannot bring heavy appliances to a shop. She begins offering home visits with clear prices. Requests grow, and she hires two trained technicians. Derya says that the turning point was not a better advertisement; it was understanding a problem that customers actually faced.

State the main idea of the text in one sentence. Give two details that support it. Explain why “Derya hired two technicians” is a supporting detail rather than the main idea.

Örnek yanıt

Understanding and solving customers' real problems can make an entrepreneurial idea succeed. Derya interviewed residents and introduced home visits with clear prices, after which requests grew. Hiring technicians is one result, while the main idea explains the broader reason for the business's success.

- Dönüm noktası ifadesinden temel başarı nedenini çıkar.
- Görüşmeler ve değişen hizmeti ana düşünceyle ilişkilendir.
- Tek sonucu genel mesajdan ayır.

3. Testing before expanding · 13 puan

In a fictional story set in 2023, two young entrepreneurs create reusable lunch containers. Their first design leaks, so they give sample containers to twenty families and ask for honest feedback. They redesign the seal and test it again before selling a larger batch. Sales later increase, but the founders continue collecting complaints. They explain that criticism is useful information, not proof that a business should immediately give up.

Write the main idea in one sentence. Identify two actions that illustrate it. Why is “Reusable containers are always profitable” not a justified main idea?

Örnek yanıt

Entrepreneurs can improve a product by testing it and responding to feedback. The founders ask families to test samples and redesign/retest the seal; they also keep collecting complaints. The text describes one fictional case and gives no evidence that reusable containers always make a profit.

- Test, geribildirim ve düzeltmenin tekrar eden örüntüsünü belirle.

- Always iddiasının tek örneğin ötesine geçtiğini fark et.

When Selin was eight, she could draw simple animals, but she could not paint portraits. At fourteen, after months of practice, she was able to complete a portrait for the school exhibition. Today, she can design digital posters and hopes to learn animation.
